

**Assignment - 4**  
**Ultrasonic Sensor in Wokwi**

Assignment Date	01NOVEMBER 2022
Student Name	GOWTHAM B
Student Roll Number	920319106301
Maximum Marks	2 Marks

**Question-1:**

Write code and connections in wokwi for ultrasonic sensor. Whenever distance is less than 100cms send "alert" to IBM cloud and display in device recent events.

**CODE:**

Sketch.ino

/\*

**Ultrasonic Simple**

Prints the distance read by an ultrasonic sensor in centimeters. They are supported to four pins ultrasoundsensors (like HC-SC04) and three pins (like PING))) and Seeed Studio sensors).

**The circuit:**

\* \* Module HC-SC04 (four pins) or PING))) (and other with three pins),  
attached to digital pins as follows:

HC-SC04	Arduino		3 pins	Arduino
Vcc	5V		Vcc	5V
Trig	12	OR	SIG	13
Echo	13		Gnd	GND
Gnd	GND			

\*/

```

#include "Ultrasonic.h"
/*
Pass as a parameter the trigger and echo pin, respectively, or only the signal
pin (for sensors 3 pins), like: Ultrasonic ultrasonic(13);
*/
Ultrasonic ultrasonic(12, 13); int distance;
void setup() { Serial.begin(9600);
}
void loop() {
// Pass INC as a parameter to get the distance in inches distance =
ultrasonic.read(CM);
Serial.print("Distance in CM: "); Serial.println(distance); distance =
ultrasonic.read(INC);
Serial.print("Distance in Inches: "); Serial.println(distance); delay(1000);
}

```
